

Datasheet

Part no: 3517503

Tested compiled technical conditions 3.328.196 ТУ

(other technical documentation)

1- Main technical information

	Name (nomination) parameters Mode (behavior-duty) and parameters device unit measurement	Acceptable operational meaning			comment
		Minimum	rating(par)	maximum	
1	Constant(fixed-permanent-stable) voltage feeding(supply-auxiliary) discharge(type-class-category) circuit, V	600	650	700	
2	Resistance at feeding(supply-auxiliary) discharge(type-class-category) circuit, M-ohms	-	6±10%	-	
3	environment temperature, °C	-60	25±10	85	
4	Cooling - natural, aerial				
5	Current feeding(supply-auxiliary) discharge(type-class-category), microAmpere	30	-	100	
6	Standing Wave Ratio (VSWR)	-	-	1.8	
7	Warm-up time, second	-	-	5	
8	Minimum service life, hours	500	-	-
